"MWG applies IoT (Internet of Things) solutions to save paper and optimize operations

- MWG is currently testing electronic price tags at TheGioiDiDong.com Luxury stores, 2 Bach Hoa Xanh stores, and 1 Dien May Xanh store in Ho Chi Minh City;
- At the same time, it is deploying dynamic QR code screens, which generate QR codes containing complete payment information for each transaction at BHX in Ho Chi Minh City. It is expected to be fully deployed in all BHX stores in May.
- The implementation of IoT solutions brings benefits such as:

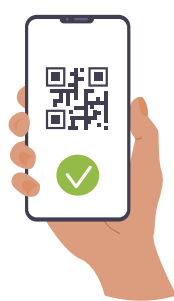

Ensure that price information is updated accurately and promptly for all stores in the chain as soon as there are changes in prices on the system.

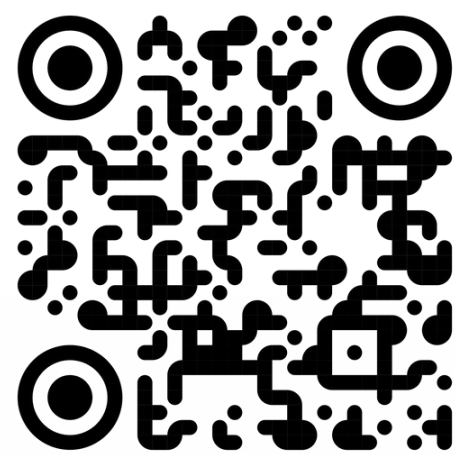

Reduce the use of paper, ink...

Optimizing operations and reducing the need for employees to change prices manually by synchronizing information in real-time.

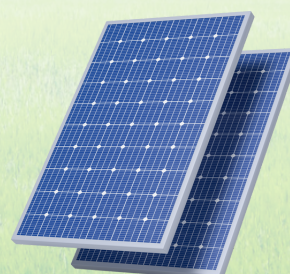

Paying by QR code helps customers to pay quickly and accurately, with just one touch, without waiting long. It reduces cash payments and supports payment methods such as MoMo and QR code payments from banks.
